

intu roller style with peace of mind

Safety in Mind encourages the use of simple features to help make window blinds safer, particularly for families with young children or pets, and the elderly.

The INTU® systems neat and simple control options eliminate unnecessary free hanging cord loops, creating one of the safest blinds you can buy.

More information about safety features for blinds can be found at www.intublinds.co.uk

innovative blinds for modern windows

the INTU® Roller blind - an exciting new addition to the INTU® range

- No drilling, No screws, No holes. Installation is simplicity itself using "INTU® Click to Fit".
- Available in a wide range of Roller Fabrics including plains and prints, reflective and blackout.
- The simple "Tilt and Raise" control makes INTU® Roller a smooth addition to your window.
- The soft curved fascia fits discreetly into the frame of the window reducing light and heat gaps, improving energy efficiency and saving you money!
- Designed with safety in mind, INTU® Roller eliminates the need for cords, loops and chains.

The new INTU® Roller blind is the latest exciting addition to the INTU® range.

INTU® Roller is the ultimate easy-to-install blind system, designed to integrate beautifully with most window systems, including conservatories, tilt and turn windows and glazed doors.

The unique design of the INTU® Roller low profile fascia gives a sleek, modern appearance, taking the popular roller blind to a new level.

Unique INTU® roller fascia INTU® streamlined bottom bar INTU® discreet fascia

The streamlined bottom rail gives perfect control. Easily locking into position at any point, INTU® Roller also provides outstanding energy efficiency and room darkening options with blackout, solar reflective and fire retardant fabrics. The INTU® Roller is also particularly 'child safe' eliminating all hanging cord loops or chains.
