CURTAIN HEADING SYSTEM

A new contemporary curtain heading system combining simplicity and style

CURTAIN HEADING SYSTEM

What makes Wave™ so unique?

- ~ When completely closed or part open, the curtains offer a smooth, continuous wave effect.
- ~ The Wave™ heading stacks back neatly, taking up less space than most traditional pleated headings.
- ~ The Wave™ glider-cord is not visible when the curtain is fully closed.
- ~ The simple yet stylish design of the Wave™ heading means curtains are easy to make up with our special cordless 70mm tape. Sewn along the top of the curtain, the pockets are in exactly the right position for our track system.
- ~ Depending on the fullness selected, Wave™ can be as economical as standard 1" tape but much more stylish.
- ~ When taken down, the curtain is flat for easy cleaning.

How it works...

A special glider-cord is contained within the curtain track, – this limits the extension of the curtain fabric, creating a smooth and continuous wave effect.

Curtain Stacking

When opened, the Wave™ System encourages the curtains to stack back neatly and straight.

Wave™ is an exciting new curtain heading system from Silent Gliss.

The glider-cord is contained within the curtain track allowing the curtain to hang in a smooth, simple and continuous 'wave' effect. As an alternative to traditional pinch, pencil pleat or goblet style headings, Wave™ offers a more contemporary curtain presentation with the economy of standard ruffling tape.

The Curtain Track Systems

wave Curtain Heading System is available with three curtain track systems from Silent Gliss.

Metropole

Decorative curtain tracks for bay window or straight applications – traditional, contemporary and minimalist styles

- The ultimate in cool contemporary.
- Hand or cord operated tracks.
- Can be bent for bay windows or other curved applications.
- Co-ordinated finials and holdbacks.
- A range of contemporary and traditional pole finishes, including metal and wood effect.
- Midials are introduced for added decorative interest.

Wave™ on a bent Metropole with White Colorama 2 fabric

Technical Information on the Silent Gliss Curtain Heading System

The system comprises 3 elements in addition to the track above:

- Special glider-cord available with either 60mm or 80mm permanently fixed spacing.
- Special flat 75mm tape designed to hang perfectly below the track.
- Special iron-on hemming tape for use between the top fabric hem for a smooth appearance.
- Silent Gliss 3582 curtain hooks for ideal positioning.

How to buy Silent Gliss Wave™

Step 1: Decide the preferred fullness and 'wave' depth of the curtain.

Before ordering components or curtains decide on your preferred fullness using the chart shown here. Using 80mm glider spacing with 160mm hook spacing giving the most open, flowing heading, whereas 60mm glider spacing with 100mm hook spacing gives the tightest waves.

*These figures are approximate and in practice they may vary by + or - 5%. Please refer to the Silent Gliss Wave™ Curtain make-up guide.

Step 2: Decide how you want to purchase your system.

MINI = Components only

Purchase through your usual supplier. If you are a consumer or occasional user then we can put you in touch with local suppliers for components or make-up.

MIDI = Assembled Wave™ System – Track only

Any of the three systems above is made-to-measure for use with the customer's own curtains. (Silent Gliss special tape no. 0870 should be used).

MAXI = Assembled Wave™ System + Track + Fabric

Made-to-measure track with Wave™ curtains made by Silent Gliss. Select from some of the Kelly Hoppen, Holland & Sherry, Signé 2 ranges or our Colorama 1 or 2 fabrics.
