# THE HIVE & PLEATED COLLECTION

---

Our brand new Hive & Pleated Blind Collection book for 2018 has been refreshed with updated designs, new textures and on trend colours.

The collection book contains 208 fabrics that have been divided into 38 ranges. The layout of the book makes for easy browsing. The left hand side includes a display of performance fabrics with traits such as advanced solar control, fire retardancy and blackout. We have also laid out all sheer, Hive and Micro options for easy reference. The right hand side is in a colourway format that features on trend fabrics in a wide range of plains, sheers, blackouts, textures and designs.

The book contains a selection of both Hive and Pleated fabrics. Hive is a cellular structure, helping to give increased insulation as well as a modern, sleek look. The fabric is anti-static, heat blocking, sound absorbent and the structure holds its shape firmly, making Hive the superior fabric choice for blinds. This collection also welcomes the introduction of Hive Micro, similar to Pleated Micro with a smaller cell, perfect for smaller spaces and bi-fold doors.

To complement this collection of exquisite fabrics, Eclipse has a choice of Senses, INTU and INTU Micro systems available. For a luxurious and flawless finish, the Senses Pleated 20mm system makes for an excellent option to co-ordinate with Senses Roller, Vertical, Mirage or Venetian. INTU Pleated is a versatile system designed to fully integrate with most window systems, including tilt and turn windows and glazed doors.

The INTU Micro 16mm system is specifically designed for narrow bead frames such as bi-fold doors. This system can be used with all Hive Micro and Pleated Micro fabric options.

For greater control over privacy, light and height control than offered by a standard INTU blind, multi-zone is the solution. Multi-zone has two moving rails allowing the blind to be operated from both the top and bottom, allowing you to position the blind where you need it in the window. This is a feature on any Hive or Pleated INTU blinds.

Hive & Pleated Collection

ENERGY-SAVING ELEGANCE

Hive is a cellular structure, helping to give increased insulation as well as a modern, sleek look. The unique cellular design holds a layer of air blocking heat from the sun, improving climate control and helping to reduce energy bills.

The fabric is anti-static, heat blocking, sound absorbent and the structure holds its shape firmly, making Hive the superior fabric choice for blinds. This collection also welcomes the introduction of Hive Micro, similar to Pleated Micro with a smaller cell, perfect for smaller spaces and bi-fold doors.

Hive fabrics are available as Lusso, Deluxe, Plain, Blackout, Blackout FR and luxury designs:

- Hive Lusso is our premium woven Hive product, developed with a high quality fabric, coloured on both sides and available in 5 colours.
- Hive Deluxe holds the same properties as standard Hive but in a softer fabric, available in 6 colours.
- Hive Plain is available in a selection of neutral tones that subtly softens the light coming into your room, creating an ambient atmosphere.
- Hive Blackout is the ideal choice for a room when additional light control is required in your home. The Blackout range consists of neutral and bright tones as well as on trend designs.
- Hive Blackout FR has all the properties of standard blackout but with Fire Retardant features, creating a safer environment.
- The Hive collection also includes three luxury designs; Silkweave, Matrix and Geo. All three designs have been inspired by key trends and are available in a total of 9 colours.

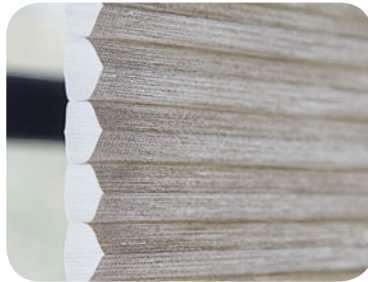

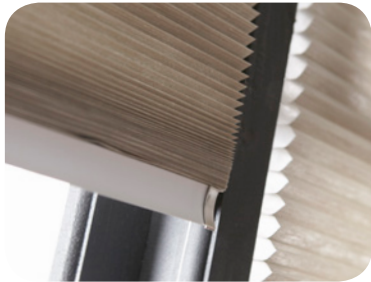

ENERGY-SAVING ELEGANCE

**HIVE BLACKOUT FR** – White, Cream, Sand, Iron, Concrete

STYLE STUDIO

Hive & Pleated Collection

INTU Pleated is a versatile system designed to fully integrate with most window systems, including tilt and turn windows and glazed doors.

For more compact spaces such as bi-fold doors, INTU Micro is available. Ribbons and Infusion Micro fabrics are designed fundamentally for this system with their 16mm pleat size.

In addition, for greater control over privacy, light and height than offered by a standard INTU blind, multi-zone is the ideal solution. Multi-zone blinds have two moving rails allowing the blind to be operated from both the top and bottom. This is available with any Style Studio Hive or Pleated fabrics.

Please refer to the INTU Info Pack for more information.

# senses<sup>®</sup>

— *pleated* —

---

The Senses Pleated system brings with it a slimline, aesthetically pleasing finish. Available with Senses Pleated are 8 rail colour and 9 endcap colours in co-ordinating shades to complete the luxurious look.

Senses Pleated has been designed with functionality in mind with two control options available; tensioned and integrated cordlock system. The tensioned system is controlled via a profiled bottomrail and it can be repositioned simply by lowering or raising the bar. The integrated cordlock system is secured by moving the cord to raise and lower the blind to the desired position.

The Senses Pleated system can be used with all Hive cellular and 20mm Pleated fabric throughout the Style Studio Hive and Pleated Collection.

Please refer to Senses Pleated Tech Info Pack for more information.

# CHILD SAFETY

## WARNING

Young children can be strangled by loops in pull cords, tapes and inner cords that operate the product.

To avoid strangulation and entanglement, keep cords out of reach of young children. Cords may become wrapped around a child's neck. Move beds, cots and furniture away from window covering cords. Do not tie cords together. Make sure cords do not twist and create a loop.

Our full range of child safety components can be found in the current pricebook and on our online ordering website.
